## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 11, 12, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Arfsten et al (US 6,410,173). Arfsten et al teach an antireflection coating including an inner layer (14), a middle layer (16) and an outer layer (18). The inner layer has an index of refraction of from about 1.54 to about 1.90 and comprises at least one first oxide of a metal selected from niobium and a second oxide selected from silicon and aluminum (col. 3, lines 7-19; col. 5, lines 1-5; col. 6, lines 16-18). The middle layer has an index of refraction of at least about 1.90 and may comprise niobium oxide in addition to other high index of refraction materials (col. 8, lines 53-60). Each layer is formed by sol-gel (col. 4, lines 29-31). Regarding claims 11 and 19, the substrate may be float-glass (col. 13, line 35), which is also a substrate used by applicant.

### *Allowable Subject Matter*

Claims 20, 22, and 23 are allowed.

### *Response to Arguments*

Applicant's arguments with respect to claims 1, 2, 11, 12, and 19 have been considered but are moot in view of the new ground(s) of rejection.

The rejections of the previous office action are withdrawn in light of applicant's arguments.

***Conclusion***
